1975. Selected bibliography of wildlife and habitats
for the Southwest. USDA For. Serv. Gen. Tech. Rep.
RM-16, 39 p. Rocky Mt. For. and Range Exp. Stn.,
Fort Collins, Colo. 80521

This bibliography contains 390 references on research
and management of important wildlife species and habitats
in Arizona and New Mexico. References selected cover a
period from 1913 to early 1975. A subject index is keyed
to an alphabetical list of authors.

Keywords: Wildlife habitat, bibliography.

SELECTED BIBLIOGRAPHY OF WILDLIFE AND HABITATS FOR THE SOUTHWEST

by

David R. Patton and Peter F. Ffolliott

Introduction

In recent years the amount of wildlife literature accumulating in professional journals has made it difficult for field biologists to maintain a reference library. As a result of many requests for literature we have gradually compiled a bibliography on wildlife habitat management reflecting the types of information sought by biologists in the Southwest.

Even though we excluded some periodicals and information on selected species this bibliography contains 390 references. Students, research and management biologists, and professors alike should find it useful in their search for information on wildlife and habitats in the Southwest.

References included in this publication cover a period from 1913 to early 1975 but we did not attempt to make them all inclusive. To make the bibliography more than a list we have provided a subject index keyed to author. A number under the subject identifies the article which is listed by author in alphabetical order. Once a reference is located and the article is obtained then more than likely it will list references we have missed or excluded.

Because of the large amount of material available we excluded references on small rodents, amphibians, reptiles, and bats. Articles that are not readily available and those from popular publications also were not included. With the exception of some final reports we did not reference federal aid job completion reports published by the Arizona and New Mexico Game and Fish Departments. In addition we chose not to include periodicals devoted to a single species such as Transactions Desert Bighorn Council.
